A-Lab
Analytics Lab
Fall
Teams of 3-4 students work on projects involving big data, algorithmic design, real time response, management and professional decision-making ability, and related business model and strategic transformation and innovations.

China Lab
Spring
Students pursue projects with partners from Fudan, Yunnan, Lianyungang, Tianjin, Xian, Jiaotong, or Shanghai Jiao Tong universities. Three-month projects, including two weeks onsite in China.

E-Lab
Entrepreneurship Lab
Fall & Spring
Students work one day/week on site at high-tech startups to experience starting and running new ventures.

EM-Lab
Enterprise Management Lab
Fall
Small teams of students work on tightly scoped, low integrative projects sourced from multinational, emerging market partners, innovators or leaders in a given space, both for profit and not-for-profit.

Finance
Finance Research Practicum (SIP)
Fall
Finance projects proposed by sponsors, motivated by actual business problems, allowing students to apply classroom learning to business settings.

Prospero in Corporate Finance/Investment Banking
Fall
Students work in teams to tackle problems posed by company sponsors and present findings to leading experts in the finance industry and classmates.

G-Lab
Global Entrepreneurship Lab
Fall & (SIP)
Four-month projects with companies in emerging markets in Latin America, China, India, Southeast Asia, Africa, and the Middle East, launching new ventures using innovative technologies. Includes three weeks of project work onsite at host organization.

Global Health Lab
Spring
Work with organizations that deliver healthcare in low-income markets to improve or increase services, and drive innovation.

GO-Lab
Executive MBA Global Organizations Lab
Spring
EMBA, each averaging 17 years of work experience, form executive advisory teams for six-month projects with multinational companies. Projects focus on cross-border management challenges and feature one-week field study trips outside North America.

H-Lab
Healthcare Lab
Fall
Four-month projects with organizations in health and healthcare. Includes up to three weeks of on-site work.

India Lab
Spring
Students work with companies on three-month consulting projects, including two weeks onsite in India.

L-Lab
Leading Sustainable Systems
Fall
Students focus on developing their individual and collective capacity for leadership. They will use systems thinking to help their project hosts address critical issues of business sustainability, where leading across boundaries is often required.

Operations
Operations Lab (Ops Lab)
Spring
Students act as consultants on business and operations improvement projects for small- to medium-size organizations in the Boston area.

S-Lab
Sustainable Business Lab
Spring
Focus on emerging strategies for sustainable businesses and organizations, using in-class simulations, cases, role playing, and speakers.

Study Tours
International Study Tours
Spring
MBA student organizes design two-week trips, five classes with syllabus, and projects with a particular business focus. Students develop case studies, blogs and poster sessions as both academic and SIP credit.

T-Lab
Enterprise Transformations in the Digital Economy
Spring
Students explore, through case studies, executive visits, and hands-on projects, what established companies must do to transform themselves for success in the digital economy. Both remote and on-site project opportunities.

*Many labs are open to graduate students from other universities that have cross-registration agreements. Please check with program coordinators for details.

INDUSTRIES/COMPANIES/PROJECTS
Virtually all industries and sizes of organizations are potential project partners. Particularly prominent are internet-based retail, health care, patient monitoring and diagnosis, and any organization seeking to become more fact-based in decision-making.
