MIT Sloan offers three optional academic tracks within the MBA program that are designed to meet the internship and career interests of their participants. These tracks have been designed to make our graduates successful on the first day of work and as they advance their careers. Each track builds on the expertise and research of our renowned faculty and provides students with theoretical and practical applications of the different functional areas covered in each track.

• Enterprise Management
• Entrepreneurship and Innovation
• Finance

"The beauty of MIT Sloan is that it gives you a unique, risk-free time in your life. Just follow your curiosity, take leaps of faith, and throw yourself into exciting and challenging pursuits. Forget about your career for a while, and believe me, it will work out."

Erdin Beshimov, MBA '11
Principal, Flagship Ventures
Entrepreneurship and Innovation at MIT Sloan

Entrepreneurship is about pursuing opportunities beyond the resources at hand. It is a state of mind—a desire and a passion for change and for making things happen. Entrepreneurs are pioneers and innovators building new businesses from scratch, or working within their organizations to create new opportunities. MIT Sloan offers a wide variety of entrepreneurship electives, including Developmental Entrepreneurship, Energy Ventures, Corporate Entrepreneurship, and Social Entrepreneurship.

The Entrepreneurship and Innovation Track (E&I):

E&I focuses on launching and building emerging technology companies. The E&I Track integrates the full resources of MIT, both technically and managerially. It builds a lifetime cohort of collaborative MBA classmates and entrepreneurial opportunities. E&I leads to the award of a Certificate in Entrepreneurship and Innovation, in addition to the MBA degree.

Clubs and Events

The Martin Trust Center for MIT Entrepreneurship:
Fosters innovation by bringing students and faculty from different disciplines across campus to engage in joint projects focused on new technologies and high-tech ventures. It facilitates business and technology partnerships by combining academic research with practical experience, and cultivates a network that unifies academic, government, and industry leaders around the vision of entrepreneurial success.

entrepreneurship.mit.edu

$100K MIT Entrepreneurship Competition:
The most well-known student business plan competition in the United States, the $100K MIT Entrepreneurship Competition has generated more than 85 companies and created more than 2,500 jobs.

mit100k.org

The MIT Sloan Sales Club:
Promotes sales as a fundamental business skill necessary for every career, either as a successful entrepreneur or as a top-level executive. The club offers a popular sales training series, the International Sales Competition, and a student-run Sales Conference.

MIT Venture Capital & Private Equity Club (VCPE):
Provides members with opportunities to learn about the venture capital and private equity industries, to interact with leading professional investors and business executives, and to develop relationships with members of the MIT community who share similar interests.

mitvcpe.com

MIT Venture Mentoring Service:
Hands-on mentoring from alumni with entrepreneurship experience provided to members of the MIT community.

web.mit.edu/vms

“One of the unique things about the Entrepreneurship and Innovation programs is that we build a cohort of students who are passionate about entrepreneurship and share an aspiration to be successful entrepreneurs.”

Edward B. Roberts
Goodwin Professor of Management of Technology
Faculty Chair and Martin Trust Center for MIT Entrepreneurship
