Rigor, ethics, and fresh thinking

The MIT Sloan Master of Finance program provides a leading-edge approach to addressing the complexities and realities of business today. Immerse yourself in a rigorous but flexible curriculum led by world-renowned faculty, explore crucial ethical issues impacting finance and work with globally recognized industry leaders on important finance problems.

You will arrive as an early-career professional passionate about finance, and graduate as a sophisticated expert with the skills, experience, and network to seize opportunities and succeed in the world of global finance.
Build your curriculum

The MFin experience is delivered in both a 12-month and 18-month format. The same degree requirements would be completed over three or four semesters. The 18-month pilot gives students the opportunity to complete an internship during their second summer. See more about the 18-month pilot at mitsloan.mit.edu/mfin/program-components/pilot/

Solid foundation

It all starts with a seven-week summer term that dives deep into theoretical finance and corporate accounting fundamentals. From there, you’ll work closely with an advisor to select graduate-level, finance-related electives, as well as courses from other departments at MIT. Or you may decide to gain specialized experience by pursuing an optional MFin concentration by taking an additional 3 electives in one of these areas:

- Capital Markets
- Corporate Finance

Action Learning

Putting theory into practice is an MIT Sloan hallmark. Whether you are onsite at a financial firm during our one-month Finance Research Practicum™ or engaged in a Proseminar with finance industry experts, you will gain practical experience and exposure. Build your network

As an MFin student, you have access to a diverse, supportive community of students, faculty, and industry leaders from across MIT Sloan—and beyond.

- Study with Andrew W. Lo, Robert C. Merton, Leonid Kogan, Antoinette Schoar, and other faculty who have profoundly shaped financial theory and practice.
- Grow your expertise, leadership skills, and peer/professional network through our myriad of clubs, conferences, and events.
- Join a global network of more than 24,000 MIT Sloan alumni and 128,000 MIT alumni—connections that will benefit you throughout your lifetime.
