

Integrating Start-Up Technologies into the Enterprise IT

Overview

Working with Tomer Simon, Amdocs' Chief Architect and CTO, who spearheads "Integrating Start-Up Technologies into the Enterprise IT" project within Amdocs' Enterprise IT, MIT Israel Lab team spent 3-week time in January 2016 working on the ground at Amdocs' headquarters in Ra'anana, Israel to create a framework or a blueprint for a startup engagement program that would allow Amdocs enterprise IT to attract, engage and work with startups with a goal to integrate the startups' technology or culture into Amdocs' enterprise IT
