

Master of Finance Program

GLOBAL. RIGOROUS. ADAPTIVE.

DEVELOPING THE NEXT
MASTERS OF FINANCE.

With the rapid pace of change affecting virtually every sector of industry and government, let the world's most adaptive finance talent help you solve problems and seize opportunities.

Since its inception, the MIT Sloan Master of Finance program (MFin) has exceeded expectations by consistently providing world-class team players who thrive in periods of change:

Academic Excellence. Our elite program has earned a global reputation for producing highly skilled graduates ready to contribute on day one.

Real-World Experience. Action Learning — applying theory to real-world problems — is a hallmark of MIT, and better prepares students for your biggest challenges.

World-Renowned Faculty. MFin students learn financial problem solving from finance's foremost authorities.

MFin graduates become part of the MIT legacy that garners respect and admiration around the world. We develop highly skilled, collaborative problem solvers adaptive to challenging environments — smart investments that pay dividends throughout their careers.

Why hire an MFin graduate?

MFin hires have the quantitative and collaborative skills to hit the ground running.

ACADEMIC EXCELLENCE

Developing skills that meet a broad range of industry needs.

We believe there is no better training ground for early-career finance professionals than MFin's elite, top-ranked STEM program, which emphasizes a foundation in how markets work and a rigorous curriculum engineered around the most advanced financial and quantitative theories and practices. Students from around the world engage in interactive team learning, preparing them to tackle your future challenges.

A rigorous curriculum—includes coursework in the foundational theories, principles and ethics students turn to throughout their careers; opportunities to apply advanced tools and models to real-world problems; and access to all MIT courses.

12- and 18-month options—allows students to further tailor the program to specific marketplace needs. The 12-month option accelerates the path to re-joining the workforce, while the 18-month option accommodates a summer internship.

Optional concentrations—enables students to further specialize their degree by completing one of three concentrations: Financial Engineering, Capital Markets or Corporate Finance.

REAL-WORLD EXPERIENCE

Preparing for the workplace by teaming up with industry practitioners.

Action Learning is a hallmark of MIT's teaching methodology—a continuous learning environment where students put theory into practice in real-world applications. With unique opportunities to navigate workplace situations and engage in meaningful conversations and business challenges, students gain relevant experience in finance and the social skills critical for success in a diverse global economy.

Proseminars—students partner with leading industry practitioners in real-world financial problem-solving experiences.

Finance Research PracticumSM—students conduct real-world team research and analysis on complex financial issues posed by industry sponsors.

Experiential Study Tours and Treks—institutional and company visits give students an opportunity to learn from professionals in different parts of the world.

Finance Speaker Series—financial and industry leaders visit campus, sharing insights and knowledge.

Master of Finance Program

WORLD-RENNED FACULTY

Learning from respected authorities on the leading edge of finance.

MIT Sloan is recognized as the birthplace of modern finance. Pioneers such as Fischer Black, John Cox, and Stewart C. Myers, as well as Nobel Laureates Paul Samuelson, Robert C. Merton, Myron Scholes and Franco Modigliani all have roots in the MIT Sloan Finance Group, a major force of change and innovation in the finance industry. The Finance Group has shaped finance theory with a 40-year legacy of creating breakthrough financial models and practices adopted by educators and practitioners worldwide:

Black-Scholes-Merton derivative-pricing model.

Modigliani-Miller theorems on corporate financing and evaluation.

Cox-Ingersoll-Ross model of the term structure of interest rates.

Employers who choose MFin graduates gain a strategic advantage, confident in the knowledge that MFin students have learned financial problem solving from the innovators defining the future of finance.

ADD IMMEDIATE VALUE TO YOUR ORGANIZATION

As innovation, regulation and globalization continue to drive change, MFin students are prepared to exceed your expectations today and continue to add value tomorrow.

MFIN SPONSORSHIPS Develop your top candidates.

The MFin Program allows government agencies, sovereign wealth funds, and corporations to develop early-career finance professionals who have demonstrated leadership potential. Employees return to your organization with a deeper understanding of complex global markets, the ability to add greater insight, and the capability to apply their advanced finance knowledge to your most pressing challenges.

MFIN NEW HIRES Invest in adaptive talent.

The MFin program provides world-class candidates for financial institutions, corporations, consulting firms, public sector organizations and fintech companies seeking collaborative, smart, analytical, principled talent. These early-career professionals are prepared with quantitative and collaborative skills and training that make them stand-out contributors from day one. MIT Sloan's Career Development Office will work with you to help identify the best candidates for your particular needs.
