- **DC.gov** - DC Department of Health
- **مصر** - Ministry of Health Egypt
- **Social Security Institute Mexico**
- **Afghanistan** - Ministry of Public Health Afghanistan
- **Instituto Nacional De Salud Pública**
- **Botswana** - Ministry of Health
In Kenya, the MYDAWA app allows users to teleconsult with a doctor (powered by ClickMedix) and get prescriptions delivered to their home.
In Uganda, Kenya, and Burundi, we work with Healthy Entrepreneurs to empower health workers using the ClickMedix app for chronic disease screening, remote doctor consultations, and e-dispensing of medications (and refills) to homes.
In Bolivia, with Pro Mujer, a micro-finance institution, women business owners can receive chronic disease screenings & health education, and get referred to clinics and other services (as needed) through Pro Mujer health workers using the ClickMedix app.
In USA, with PopIQ Health, care teams including doctors, pharmacists and health coaches can provide AI-facilitated decision-support to provide comprehensive care to patients while save on costs.
All-in-one population health + case management platform

PopIQ

- Telehealth Device Integration
- AI-Powered Population Analytics
- Claims & Beneficiary Management Integration
- Care Management
  - Intervention intelligence: measures and improves effectiveness of interventions
- Clinical Integration
- Patient Engagement
- Reporting and Measuring
- Care Coordination
