the class Israel Lab 15.248

On campus this fall, we learned about the history and growth of Israel's unique startup environment, and then spent 3 weeks in Tel Aviv exploring business concepts through a sponsored project.

the company Time to Know

A next-generation Ed-Tech solutions company, TTK empowers the human connection in digital learning. The place the learner and instructor in the center of the learning process with their learning management systems and business analytics tools.

the product Ha-BI-Lis

A predictive analytics tool, Ha-BI-Lis empowers educators to improve course dropout rates by predicting drop risks before performance drops and providing contextual intervention recommendations.

the project

We were tasked to develop a full go-to-market strategy for a new spin-off Ed-Tech product, spending 3 weeks in the Tel Aviv partner incubator EDvantage developing the steps at right. We provided TTK a 12-month plan to build a business around their new product as a fresh Ed-Tech startup.
